Professional Summary

Motivated and detail-oriented Computer Science Engineering student with strong proficiency in Python, Data Analysis, Machine Learning, NLP, and AI-driven application development. Experienced in working with data preprocessing, exploratory data analysis (EDA), machine learning workflows, and real-world dataset handling using Pandas, NumPy, Scikit-learn, and NLP libraries. Skilled in building AI-enabled web applications using Django, Flask, and React while developing scalable backend systems and ML-powered solutions.

Career Objective

Seeking an opportunity as an AI/Data Intern where I can apply my skills in Python, Machine Learning, Data Analysis, NLP, and backend development to solve real-world problems. Eager to contribute to AI-driven projects involving data preprocessing, exploratory data analysis, and intelligent systems while continuously enhancing my technical and problem-solving abilities.

Education

Rajiv Gandhi University of Knowledge Technologies (RGUKT), Basar

Bachelor of Technology (B.Tech) in Computer Science Engineering

2023 – 2027

CGPA: 8.9

Rajiv Gandhi University of Knowledge Technologies (RGUKT), Basar

Intermediate Education

2023

CGPA: 9.67

SR Prime School

Secondary School Education (SSC)

2021

CGPA: 10.0

Technical Skills

Programming Languages: C, Python, Java

Web Development: HTML, CSS, JavaScript, React.js, Django, PHP, Spring Boot, Flask

Databases: MySQL, SQLite

Data Science / AI / ML: Pandas, NumPy, Scikit-learn, NLP, NLTK, TextBlob, VADER, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Feature Engineering, Text Processing, Tokenization, Model Evaluation

Tools & Platforms: Git, GitHub, VS Code, Docker, Netlify

Core Subjects: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Internship Experience

Infosys Springboard Internship – ML-Powered Fraudulent Website Detection Framework

- Completed a project-based internship focused on ML-powered fraudulent website detection for enhanced cybersecurity.
- Worked on machine learning workflows, phishing website detection techniques, and model evaluation.
- Gained practical experience in data preprocessing, feature extraction, and predictive modeling.
- Improved understanding of cybersecurity concepts and real-world ML implementation.

Projects

Interactive Data Dashboard

Technologies: Python, Django, HTML, CSS, JavaScript, Pandas, NumPy, Plotly, Chart.js, MySQL, GitHub

- Developed an interactive dashboard for uploading and analyzing CSV/Excel datasets.

- Implemented data preprocessing and cleaning using Pandas and NumPy.
- Created interactive charts and visualizations using Plotly and Chart.js.
- Designed responsive frontend interfaces using HTML, CSS, and JavaScript.
- Integrated database functionality for dataset management and storage.

Sentiment Analysis using Django & Machine Learning

Technologies: Python, Django, Scikit-learn, NLTK, TextBlob, Pandas, NumPy, HTML, CSS, JavaScript

- Developed a sentiment analysis web application capable of classifying text as Positive, Negative, or Neutral.
- Implemented NLP preprocessing techniques including tokenization, stop-word removal, regex-based text cleaning, and feature extraction.
- Integrated machine learning models using NLTK, TextBlob, and Scikit-learn.
- Built CSV upload functionality for bulk sentiment analysis.

Job Tracker System

Technologies: Java, Spring Boot, Spring Security, JWT Authentication, React.js, MySQL, REST APIs

- Built a full-stack job tracking platform with secure authentication and application management.
- Implemented JWT-based authentication and authorization using Spring Security.
- Developed responsive frontend components using React.js.
- Integrated REST APIs for seamless frontend-backend communication.

Phishing Website Detection System

Technologies: Python, Flask, React.js, Scikit-learn, Pandas, NumPy, REST APIs

- Developed a machine learning-based phishing website detection system.
- Implemented URL preprocessing, feature engineering, and data cleaning pipelines for phishing prediction.
- Built backend APIs using Flask for real-time prediction handling.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics.

Certifications

- IBM SkillsBuild – Artificial Intelligence Fundamentals
- Infosys Springboard Internship – ML-Powered Fraudulent Website Detection Framework
- Machine Learning for Business Analytics – Kakatiya Sandbox
- Internal Hackathon Participation – RGUKT Basar
- Multiple Udemy Course Completion Certifications

Achievements

- Secured AIR 5711 in GATE 2026.
- Maintained excellent academic performance with a CGPA of 8.9 in B.Tech.
- Built multiple full-stack and machine learning-based applications.

Strengths

- Problem Solving and Analytical Thinking
- Full Stack Web Development
- Machine Learning and Data Analysis
- Backend API Development
- Team Collaboration and Quick Learning
